SUMMARY

Computer Engineering undergraduate (GPA 8.5/10) with hands-on full-stack development experience in React, Node.js, Express, MongoDB, and Flask, and applied AI integration via the OpenAI API. Solved 150+ Data Structures & Algorithms problems on LeetCode. Built and deployed two production-style full-stack applications independently, from system design through deployment. Seeking Software Development Internship roles for Summer/Winter 2027.

EDUCATION

Bharati Vidyapeeth (Deemed to be University) College of Engineering, Katraj, Pune *July 2023 – June 2027*

Bachelor of Technology in Computer Engineering — GPA: 8.5 / 10

PROJECTS

AI-Powered Resume Reviewer | React.js, Node.js, Express.js, OpenAI API, MongoDB, Tailwind CSS *Feb 2026 – Mar 2026*

- Built a full-stack web app that lets users upload or paste resumes and receive structured feedback on ATS compatibility, grammar, keyword optimization, and content quality.
- Integrated the OpenAI API to generate personalized resume improvement suggestions, validated at ~90–95% relevance across 40+ test resumes spanning multiple formats and industries.
- Implemented JWT-based authentication, resume history storage, and a responsive dashboard using React, Express.js, and MongoDB.
- Designed real-time loading states, markdown rendering, and downloadable PDF feedback reports, cutting average review turnaround from several minutes to under 20 seconds.
- Live demo: [add link] | Repo: github.com/chandralata18/ai-resume-reviewer

Real-Time Collaborative Notes App | React.js, Node.js, Express.js, Socket.io, MongoDB, JWT *Nov 2025 – Dec 2025*

- Built a Notion-style collaborative note-taking platform supporting simultaneous multi-user editing via Socket.io WebSockets.
- Implemented JWT authentication, workspace management, and note version history with automatic MongoDB sync.
- Reduced client-server synchronization latency to under 200ms through event-driven communication design.
- Deployed with persistent cloud database support, enabling real-time collaboration across devices.
- Live demo: [add link] | Repo: github.com/chandralata18/collab-notes

Advanced To-Do List App | React.js, Node.js, Express.js, MongoDB, JWT *[add dates]*

- Created a sleek task management app with secure user login, deadlines, priority-based sorting, and progress tracking.
- Built persistent data storage with MongoDB and JWT-based authentication to keep user tasks synced across sessions.
- Live demo: [add link] | Repo: github.com/chandralata18/advanced-todo-app

POSITION OF RESPONSIBILITY

Marketing Team Member — Computer Engineering Student Association *2024*

- Contributed to marketing strategies, social media management, and event promotions to enhance audience engagement.

CERTIFICATIONS

- Data Science for Engineers — NPTEL
- Database Management System — NPTEL
- 5-Day AI Agents Intensive Course — Google

SIMULATIONS

Job Simulation — Technology / Solution Design, Deloitte Australia (via Forage) *June 2026*

- Completed a virtual job simulation on software development and solution design; proposed a secure machine health monitoring dashboard based on client requirements, applying core software design principles.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React, Node.js, Express.js, Flask, FastAPI, JUnit, Material-UI, pandas, NumPy, Matplotlib

Developer Tools: Git, Docker, GCP, TravisCI, VS Code, IntelliJ, PostgreSQL

Coding Profiles: LeetCode: [add handle/rating] | GitHub: github.com/chandralata18
